★ SUPPORT THE ★ ★ AUDIOLOGY ★ ★ PATIENT CHOICE ACT ★

It's time to bring Medicare coverage for Audiology up to par with the rest of America—especially since hearing and balance disorders are most common amongst patients covered by Medicare.

If you're tired of having to seek a doctor's referral for visits to your audiologist, or paying out of pocket to cover these medically necessary services, then it's time to reach out to Congress and say enough is enough! Tell Congress to support the **Audiology Patient Choice Act**.

The Act will:

- **Improve access to care** by allowing you to seek treatment directly from your audiologist.
- **Authorize Medicare reimbursement** for covered services when provided by your audiologist.
- **Address the medical provider workforce shortage** confronting our country by including audiologists in the list of Medicare recognized physicians.
